This note may save your life, Commander.

When playing the Disc version of Amstrad 'ELITE', you must leave the Program Disc in the drive at ALL times, – unless you are DOCKED and have accessed the DISK MENU.

Only then should you remove the Program Disc and insert your Saved Commander Disc (which needs to be a formatted disc), to use the LOAD, SAVE and CAT commands.

Before using the EXIT option, you must insert your Program Disc. Failure to do this can result in many hours of hard combat and trade being lost to the void due to undesirable elements being introduced. Generally, 'pulling the plug' will return control of your Amstrad back to you.
